

# Muhammad Irsyaduddin Firdaus Bin Jumai

## Software Developer

[irsyaduddin2409@gmail.com](mailto:irsyaduddin2409@gmail.com) | [LinkedIn](#) | [Github](#) | [Website](#) | Available Immediately

### PROFESSIONAL SUMMARY

**Software Developer** with over **3 years** of experience designing, building, and deploying **mobile applications (C#, Unity)** and **web applications (JavaScript, TypeScript, React.js, Next.js, Node.js)**. Proficient in **relational databases (SQL, MySQL, PostgreSQL)**, **Python-based data pipelines**, **RESTful APIs**, **Git**, and cloud-based solutions. Strong background in **Agile and Scrum** methodologies, quickly adapting to new tools, improving team productivity, and delivering high-quality solutions.

### SKILLS

- **Programming Languages:** C#, JavaScript, TypeScript, Python
- **Full-Stack Development:** React.js, Next.js, Node.js, RESTful APIs, HTML, CSS, Tailwind CSS
- **Databases:** SQL, MySQL, PostgreSQL, Database Modelling, ETL & Data Warehousing, Power BI
- **Tools & Practices:** Git, GitHub, Unit Testing, Agile & Scrum, SDLC, UAT & QA Testing, Object-Oriented Programming (OOP)

### WORK EXPERIENCE

#### Agmo Tech Sdn Bhd (Agmo Group)

##### Software Developer (XR) | Feb 2022 - Dec 2025

- Developed mobile, AR, and VR applications in C# using Unity, across Android, iOS, and headset platforms, as part of a cross-functional team delivering multiple successful commercial projects
- Worked within a dedicated R&D team, rapidly learning new tools and technologies to solve problems under project deadlines
- Applied the full software development lifecycle (SDLC), including UAT, to ensure high-quality, functional deliverables
- Collaborated with cross-functional departments and clients to translate requirements into technical implementation, presenting completed work to both technical and non-technical audiences

##### ***BNM MAG in Your Pocket (MAGnet) Exhibition App***

Android: [MAGnet - Apps on Google Play](#) | iOS: [MAG In Your Pocket \(MAGnet\) App](#)

- Co-developed a mobile XR exhibition app for Android and iOS, tailored to client requirements, driving stronger project adoption and customer engagement
- Delivered a high-quality AR/VR application in close collaboration with designers and developers, boosting client review scores and strengthening the team's reputation
- Set up asset management workflows that kept delivery stable and cut iteration time
- Evaluated and integrated new tools and SDKs under tight deadlines, quickly adapting to unfamiliar technical requirements

#### MIMOS Berhad

##### Graduate Trainee AR Developer | Feb 2021 - Nov 2021

- Researched and developed a mobile AR application for a client, from concept through to a working prototype
- Prepared Technical Specification and High-Level Design Documents for project review and handover
- Conducted QA testing to identify defects and improve usability ahead of delivery
- Collaborated with the IoT team, designers, and client stakeholders through storyboarding and requirement discussions

### PROJECTS

#### Malaysia Fuel Price Tracker | Next.js Portfolio Project

[GitHub](#) | [Live Site](#)

- Built a web app using **React**, **Next.js**, **Node.js**, and **TypeScript**, pulling live weekly RON95/RON97/diesel prices from Malaysia's data.gov.my API through a custom **REST API** route
- Built 5 dashboard sections, including a BUDI95 subsidy comparison, a regional diesel comparison, and a fill-up cost calculator, using **Recharts** and **Tailwind CSS** with responsive, container-query-based layouts
- Created 15 **unit tests** with **Jest** and **React Testing Library** covering the core calculation logic, then deployed to **Vercel** with a light/dark theme toggle and a generated social preview image

#### Perodua Vehicle Registration Analytics | Power BI Portfolio Project

[GitHub](#) | [Live Power BI Dashboard](#)

- Built an end-to-end **BI pipeline**: data.gov.my (JPJ) source data → **Python ETL** → **MySQL** data warehouse → **Power BI**, processing **5.4M+ vehicle registration records** across **149 manufacturers** (2019–2026)
- Designed a **star-schema data warehouse** and created **DAX** measures for market share, year-over-year growth, and competitive brand ranking
- Built two interactive dashboard pages plus a drill-through page, turning raw registration data into actionable market insights

## EDUCATION

---

### Bachelor of Computer Science (Hons.) Multimedia Computing

Universiti Teknologi MARA (UiTM) | CGPA: 3.46

Relevant coursework: C++, Java, Object-Oriented Programming, Data Management & SQL, Front-End & Back-End Development

## LANGUAGES

---

**Bahasa Melayu:** Native

**English:** Proficient
